## About Me

I have been doing web development since a long time and I got love with it. I have tried many technologies over the years and it was very interesting working with them. I also have done some open sourcing and continue to contribute to developer community as much as I can.

## Work Experience

- Frontend developer at Asakabank

Jun 2022 — Oct 2022

Full-time

Built crm for company. Used understanding of React.js fundamentals to promote better component lifecycle practices, increasing turnaround speed by 20% with 100% deadline adherence. Fixed bugs and refactored the source code to provide a better scalability.

- Frontend developer at ABUTECH

Jan 2022 — May 2022

Full-time

Design services in collaboration with an architect.  
Migrate legacy express application to the GraphQL.  
Fix leaks in the subscriptions module.  
Code review of other developers according to specific rules.

- Frontend developer at IT Time

Feb 2021 — Dec 2021

Part-time

We worked as a team with online stores, crm systems, animations
